Silver Lake, IN 46982 U.S.A.
FAX: 260-352-2160

maintenance:

Regular inspection and maintenance of all parts, and fasteners is necessary. Tighten all bolts and nuts. Inspect Tops, Seats, Legs, Braces and Fasteners periodically for wear or vandalism. Replace broken or worn parts immediately or take equipment out of service until repairs are made. Use genuine Wabash Valley replacement parts.

To restore plastisol coating to its luster after prolonged use, wash/rinse/dry and use Armor-All ® or similar quality vinyl protectant.

KEEP THIS ASSEMBLY/SPECIFICATION SHEET FOR FUTURE REFERENCE.

specifications:

NOTE: We reserve the right to change specifications without notice.

Heat fused poly-vinyl coating, finished on inner-metal structure, to an approximate 3/16" thickness. Framework assemblies are finished with powder coating; electrostatically applied and oven cured according to powder manufacturer's specifications. Fasteners are stainless steel to resist corrosion.

BENCH FRAME:

Leg assembly is constructed of 2 7/8" od x 9 gage structural steel tubing. The insert tube, used to adapt the inground legs, and welded to the underside of the leg assembly, is 2 7/8" od x 12 gage structural steel tubing. Mounting brackets are 7 gage sheet steel. Surface mount, welded to frame, and inground leg adapters use 2 7/8" od x 9 gage structural steel tubing for its main support.

SEATS:

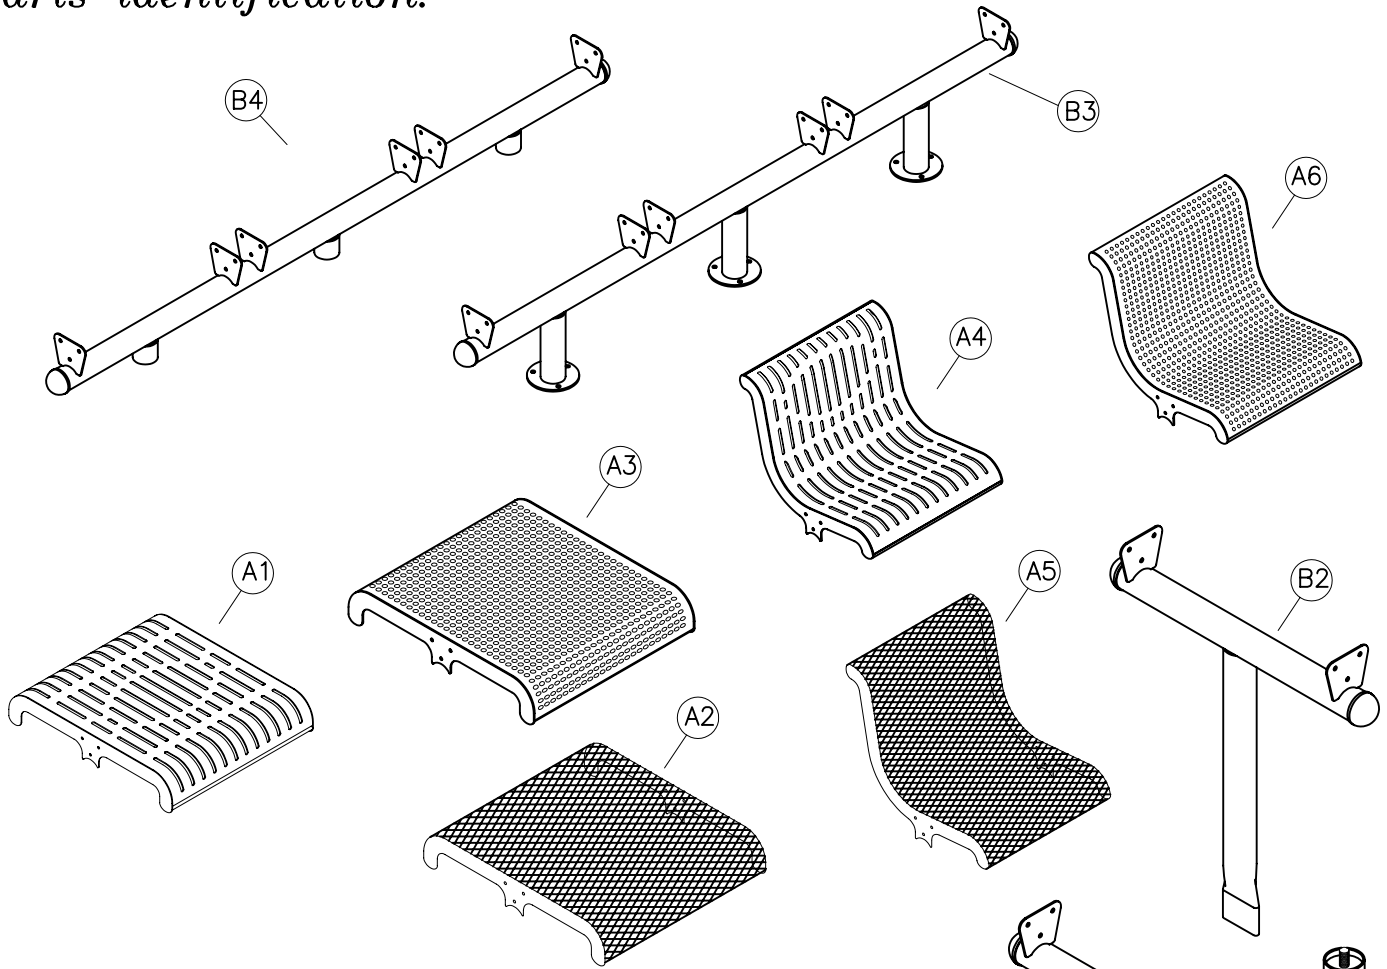

Expanded metal seat uses fabricated 3/4" #9 expanded steel mesh. Framing consist of 10 gage sheet steel. Support brace, for the ends of the formed expanded steel mesh is a 1/2" diameter rod for the seat without back and die formed 14 gage sheet steel for the seat with back. Rib seats are made of 10 gage and perforated seats are 12 gage sheet steel. Framing is the same as for the expanded metal seats.

GENERAL:

Ground space requirements:

- 1 Seat straight bench without back, surface mount, is 30 1/2" x 30 3/8" and 18" to the top of the seat.
- 1 Seat straight bench with back, surface mount, is 30 1/2" X 27 3/8", 17 7/8" to the top of the seat and 34 5/8" to the top of the back of the seat.
- 3 Seat straight bench without back, surface mount, is 88 3/4" X 30 3/8" and 18" to the top of the seat.
- 3 Seat straight bench with back, surface mount, is 88 3/4" X 27 3/8", 17 7/8" to the top of the seat and 34 5/8" to the top of the back of the seat.
- 1 Seat straight bench without back, inground, is 30 1/2" x 30 3/8" and 18" to the top of the seat.
- 1 Seat straight bench with back, inground, is 30 1/2" X 27 3/8", 18 1/2" to the top of the seat and 35 1/4" to the top of the back of the seat.
- 3 Seat straight bench without back, inground, is 88 3/4" X 30 3/8" and 18" to the top of the seat.
- 3 Seat straight bench with back, inground, is 88 3/4" X 27 3/8", 18 1/2" to the top of the seat and 35 1/4" to the top of the back of the seat.

ITEM PART # DESCRIPTION

ITEM	PART #	DESCRIPTION	QTY
A1	7931	STRAIGHT LOW PROFILE RIB SEAT	1 OR 3
A2	7686	STRAIGHT LOW PROFILE EXPANDED METAL SEAT	1 OR 3
A3	8027	STRAIGHT LOW PROFILE PERFORATED SEAT	1 OR 3
A4	7924	STRAIGHT RIB SEAT	1 OR 3
A5	7683	STRAIGHT EXPANDED METAL SEAT	1 OR 3
A6	8023	STRAIGHT PERFORATED SEAT	1 OR 3
B1	7268	SINGLE SEAT STRAIGHT FRAME SURFACE MOUNT	1
B2	7269	SINGLE SEAT STRAIGHT FRAME INGROUND	1
B3	7286	3 SEAT STRAIGHT SURFACE MOUNT FRAME	1
B4	7100	3 SEAT STRAIGHT INGROUND FRAME	1
C1	7219	INGROUND LEG TUBE	3
C2	7121	MOUNTING PLATE COVERS (OPTIONAL)	1 OR 3

hardware identification:

* FOUNDATION SECUREMENT HARDWARE NOT INCLUDED.

ITEMS INCLUDED IN HARDWARE PACKAGE #:

ITEMS	PART#	DESCRIPTION	21031 QTY	21089 QTY	21101 QTY
D	17019	3/8-16 HEX NUT - SS	18	6	0
E	17028	3/8" FLAT WASHER - SS	36	12	0
F	17013	3/8-16 x 1 1/4" HEX HEAD BOLT - SS	12	0	0
G	17041	3/8-16 x 1 1/4" MACHINE SCREW - SS	6	6	0
H	17052	1/4-20 x 1" MACHINE SCREW - SS	0	0	2
J	17200	3/8" SPLIT LOCK WASHER - SS	18	6	0

ASSEMBLY TOOLS REQUIRED

- 1 - 3' OR 6' LEVEL
- 2 - 9/16" WRENCHES
- 1 - REGULAR TIP SCREWDRIVER

assembly procedures: IMPORTANT: Assemblers should be reasonably skilled in the assembly of commercial grade/heavy duty fabricated steel equipment.

To ensure proper assembly, it is suggested that you take adequate time to locate and identify each part. To prevent scratching of the finished pieces, we recommend this unit to be assembled on a clean, flat, solid, surface with a drop cloth, allowing plenty of working room. Also please read the instructions and study the sketches very carefully. A little extra time spent before assembly will be well worth it in performing a complete, proper assembly. Please note that all parts have been pre-cut and pre-drilled.

During the assembly process leave all bolts and nuts "finger tight", until the entire unit is completely assembled. This allows room for movement to level or adjust all seats, tops, benches, framework and braces if necessary. After final adjustment and leveling, permanently tighten all nuts, bolts and fasteners.

7L

STEP 1 For 1 seat models go to STEP 2.

STEP 1 For 2 and 3 seat inground models.

Invert the (B7 or B8) leg assembly so it's upside down on a flat surface. Screw a (C1) leg adapter to the tube extending out away from the under side of the leg assembly FIG. 1. Draw the adapter to a tight, not just hand tight fit. Repeat Step 1 to attach the remaining leg(s).

STEP 2 For surface mount model.

The surface mount model is most preferred to be installed on existing concrete. If new concrete is to be installed, we suggest that the new concrete be poured and cured, then install the surface mount model afterwards.

Place the surface mount model in its chosen location. Use some form of a marking instrument to trace the hole pattern in each of the surface mount legs. This will allow you a more precise installation when securing the bench.

Drill and place the bench's foundation securement hardware. When the foundation securement hardware has been installed, place the unit in its new location and secure to the foundation.

STEP 2 For inground model.

Place the inground leg assembly, with its attached inground legs, in the units chosen location(s). Stand the leg assembly so each end of the inground leg is touching the ground. Mark a 12" diameter hole around each end of the legs as shown in FIG. 2. Remove the leg assembly and prepare one or three foundation hole(s) as shown on page 4.

Block the leg assembly similar to what is shown in FIG. 3.

Before pouring concrete, make sure the leg assembly holds 17" to the top or the leg assembly's seat mounting brackets and is level horizontally as well as vertically.

Pour concrete and let cure for 48 hours.

STEP 3 For all models.

Place each (A-) seat over each end of the leg assembly's seat mounting brackets, see FIG. 4. Please take note to FIG. 5, showing which hardware is required to be used when installing the seats to the leg assembly's seat mounting brackets. Use two flat washers and one lock washer per each bolt. Draw the fasteners to a snug fit.

Level the seats if necessary and tighten all fasteners with wrenches and/or screwdriver.

If mounting plate covers (C2) are used, place halves around legs and secure with 2 (H) screws, see FIG. 6. Draw to a snug fit being careful not to over tighten.

installation: WARNING: The proper installation for Wabash Valley products may depend upon many factors unique to the site, location, or use of a particular product. Consult with your contractor or other professional to determine your specific installation requirements.
